

plantosverde.
residential spray programme

Mixture:

1 x rounded teaspoon to 1 litre of water. Mix in a spray bottle and apply a fine mist to the leaves. Spray early morning or evening.

*When planting from seed – spray when first leaves appear. When replanting, we suggest dipping the roots in the plantosverde mixture, before planting.

How to apply mixture:

Seedlings

1. When first leaves appear = apply a fine mist of a 2% solution = 2g/litre
2. When first flowers appear = apply a fine mist of a 2% solution = 2g/litre
3. 3rd application after 7 days = apply a fine mist of a 3% solution = 3g/litre
4. 4th application after 7 days = apply a fine mist of a 3% solution = 3g/litre

Fruit trees

1. When growing from seed apply mixture after the first few leaves appear.
(if tree is fully developed mixture can be applied immediately)
2. Apply again 14-21 days later
3. Apply again when first flowers appear
4. Apply again when first fruits appear (do not spray a week prior to harvesting)

How to apply mixture:

Lettuce (salad leaves)

1. Apply mixture when first leaves appear
2. Apply again every 7 days till harvest

Vegetables

1. Apply mixture when first leaves appear
2. Apply again when first flowers appear
3. Apply again when first fruit/veg appear
4. Apply again every 7 days till end of harvest

How to apply mixture:

Fruit

1. Application when plant is about 15cm high or has first leaves
2. Application 14-21 days later
3. Application 14-21 days, repeating till end of season

Potato

1. Apply mixture when plant is about 15-20cm in height (4 leaves)
2. Apply again 14-21 days later
3. Apply mixture when flowering starts
4. Apply once more after 14-21 days later

How to apply mixture:

Melon

1. Apply when melon plants are 20cm large/high
2. Apply again 14 days later
3. Apply 21 days later and then repeat till the end of season

Grass

1. Apply mixture after cutting/mowing
2. Apply again 7-14 days later
3. Apply once more 21 days later and repeat the process
