

Observation:

Crop: Pears, williams

Place: Slovenia, near Croatian boarder

Date: 10.7.2012

Remarks: plantation had no fruits in 2010 due to cutting old trees down to 60 cm, very bad general conditions, it was decided not to cut down the trees for new plantation, but to try out with PV

Application : mai , june,july, august 2012-10-14

Pictures : visit 10.7.2012,

Tress were still growing new leaves ,no insects, no fungus, brix about 7-9

Pictures 2. Visit:

Remarks: Trees were still growing new leaves, the fruits were getting close to crop, no signs of insect damage, no fungus, etc, brix was above 15 already

Excellent crop is expected.
