

SPRAY PROGRAMME: OLIVES

Application for Olive Plantation (per hectare)

SOLUTION = 3KG / 1000L / HECTARE

1st Application: 3kg when new leaves are out or first leaves on newly planted tree

2nd Application: 2kg 14-21 days later

3rd Application: 3kg 14-21 days later or after flowering

4th Application: 2kg 30 days later

5: 2kg every 30 days till 3-4 weeks before harvesting

6: 3kg Post Harvest Spray

NOTE:

In case that trees are in larger distance to each other, calculate about one good spraying with a 0, 3% solution per tree, this is about 2-6 liter of solution, or 6-20 gr per tree.

(Always stop spraying 4 weeks before harvesting is foreseen in order not to have dust particles on fruits. There is no danger, in case there are some particles on, but optical impression is better without)
