

SPRAY PROGRAMME:

WALNUT, HAZELNUT, MACADAMIA, CASHEW, PECAN NUTS

SOLUTION = 3KG / 1000L / HECTARE*

*Spray the mixture using a fine mist in either the evening or early morning.

1. 3 KG WHEN PLANT HAS LOST ALL LEAVES, BEFORE WINTER, STEM AND BRANCHES - A SOLUTION OF ABOUT 0,3 % OR 2-3 KG/HA
2. 3 KG WHEN FIRST FLOWERS ARE OUT FOLLOWING SEASON (SPRING)
3. 3 KG 14-21 DAYS LATER OR AFTER FLOWERING
4. 2 KG 28 DAYS LATER
5. 2 KG EVERY 28 DAYS TILL 3-4 WEEKS BEFORE HARVESTING

NOTE:

ALWAYS STOP SPRAYING 4 WEEKS BEFORE THE LAST TIME WHEN HARVESTING IS FORESEEN - IN ORDER NOT TO HAVE DUST PARTICLES ON FRUITS. (THERE IS NO DANGER, IN CASE THERE ARE SOME PARTICLES ON, BUT OPTICAL IMPRESSION IS BETTER WITHOUT)
